Date: 08/10/2009

Novi, Michigan – July 10, 2009

Honovi Solutions, a leading supplier of revenue assurance and switch provisioning solutions, has targeted its latest internal corporate investment at the next generation VoIP switches. The Nokia Siemens Networks (NSN) hiQ family of switches is a leading alternative to traditional switches with production deployment by carriers across the globe increasing rapidly. Completion of the Switch Interface Module that allows Honovi's inSwitch platform to interact with the hiQ brings all of Honovi's features and benefits including automated switch provisioning, validation, revenue recovery, identifying stranded assets and least cost quality of service balanced routing to networks that incorporate this switch. Properly configured and deployed, Honovi inSwitch applications significantly increase the productivity of the network engineering personnel maintaining the call handling data these switches depend on. Because next gen VoIP switches easily handle carrier customers in hundreds of rate centers, Honovi's currently impressive value proposition increases geometrically in the VoIP environment. **General availability of the NSN hiQ inSwitch option is scheduled for November 15, 2009!**

"Completing this initial project will simplify extending our technology to all of the switches competing in this niche" says Mike McCallum, Chief Technology Officer, Honovi Solutions.

For additional information on Honovi's NSN hiQ option or any other aspect of Honovi's product and service portfolio, contact Dominick Calabrese at dcalabrese@honovi.com.

About Honovi – Honovi Solutions develops products that enable Telecommunication Companies and owners of private communication networks to radically reduce network operating costs and protect revenue streams by increasing efficiency, network integrity, and user satisfaction. We are exclusively focused on this niche. Our goal is to become the worldwide leader in automated switch provisioning and network integrity solutions. Honovi can be reached at (248) 994-4700 or www.honovi.com
